YOU DREAM, WE MAKE IT HAPPEN

Established in June 1977, J&J Teixeira is the largest industrial woodworking integrated service in the country. Born of the ambition of João Teixeira, founder and president of the Board, the company has grown solidly, always revealing its great sense of opportunity to earn its own space in the industrial sector and the preferences of the market. The company's culture is founded on quality and professionalism. These values come from the strong commitment of the 250 employees who operate the most advanced equipment and technological solutions.

In business, technology has always been seen as a fundamental strategy to maintain a high degree of competitiveness. For this reason, at the beginning of the millennium, J&J Teixeira carried out a complete physical restructuring of the production area, combining this with a strong investment in new technological solutions and business resources software. For the company this was a crucial change to meet the new challenges of the Woodworking industry. The excellent performance of the technology depends on the competence and efficiency of the human resources.

J&J Teixeira has an extensive technical team that is able to respond to the customized challenges and aspirations of each client. J&J Teixeira is proud to produce solely in Portugal and to have kept employees at the organisation since the beginning. The success of J&J Teixeira in the competitive Industrial Woodworking market is due to the commitment of this group of dedicated experts.
